

~~I am 19 years~~

I am Sanant Jain. I have two sisters and I am the youngest one. Both of my sisters have done Btech in CSE and I am also doing the same.

I am currently pursuing my Btech degree in computer science engineering from Jaypee Institute of Information Technology. I am a self-driven and a self-motivated student.

My most absorbing hobby of playing badminton benefited me a lot in my studies. I spent almost one and half hour playing which refreshes my mind and help me to focus on my goals. I have learned many computer languages such as C, C++, Java, and script and I am also very much in coding and always eager to know the cause not the effect.

I have reached to state level in badminton, I have been playing it for last six years and participated in marathons on any school sports meet, you are right. you can call me fitness freak. My family, especially my mother, has been the much source of encouragement and motivation for me. That is why I myself am a truly self-inspired, strengthened and dedicated fellow today. I have learnt a lot from my mistakes and from my failures. I never regard my failure as a curse or ~~rather than~~ an opportunity to improve and to improvise.

My role model are my sisters. They truly inspire me to be a good software engineer. One's future can be determined by what one has achieved today or what one is doing today. So far I have proved myself being the best one

in all fields like in academics, extracurricular and  
in personal domains. All of this success, hard  
work ~~and~~ is truly credited to my parents who  
have made this possible for me.
